Kgatle Kgaugelo

makhobanekgaugelo@gmail.com | 0637310173

Motivated and detail-oriented Computer Science student at Tshwane University of Technology. Currently in my final year . Passionate about technology, teaching, and coding, with a strong foundation in software development, data structures, and problem-solving. Experienced as a lab tutor, assisting students with debugging code and reinforcing theoretical concepts through practical application. Eager to gain industry exposure through an internship where I can contribute meaningfully while developing technical and professional skills.

Professional Experience

Tshwane University of Technology 09/25 - 11/25

Lab Tutor and Refurbishment Assistant

- Assisted students in understanding lab exercises and debugging code
- Supported lecturers in managing lab sessions and providing academic guidance
- Reinforced theoretical concepts with practical application
- Refurbished broken computers

Tshwane University of Technology
Lab Tutor (Volunteer)

- Assisted students in understanding lab exercises and debugging code
- Supported lecturers in managing lab sessions and providing academic guidance
- Reinforced theoretical concepts with practical application

03/25 - 06/25

Education

Tshwane University of Technology
Diploma in Computer Science (Extended) - Currently Final Year

Mohlatlego Machaba Secondary School

- Graduated November 2021

Projects

Education Support System (Group Project)

Technologies: (JavaScript,R, HTML/CSS, SQL)

- Developed a system to help teachers manage workloads, teaching materials, and student resources
- Improved efficiency by organizing lesson plans and educational content in one platform
- Contributed to UI design, backend functionality, and testing

Matric Application Recommendation System (Group Project)

Technologies: (JavaScript,React, Firebase, HTML/CSS, SQL)

- Created a system that helps matric students search and apply for tertiary opportunities
- Implemented recommendation features to help learners choose suitable courses
- Assisted with designing user flows and building the application interface

Disability Assistance System (Group Project)

Technologies: ((JavaScript,React, Firebase, HTML/CSS, SQL, Python, Speech-to-Text APIs)

- Built a system supporting students with disabilities by offering voice-to-text and sign-to-text features
- Aimed to improve accessibility, learning, and social participation
- Contributed to the integration of assistive technologies and testing

. Weather Checker System (Personal Project)

Technologies: (JavaScript API, Python, Html, CSS.)

- Designed a system that checks weather for multiple locations
- Implemented real-time weather API integration and clean user interface
- Strengthened problem-solving and independent development skills

Key Skills

- Strong Communication
- Critical thinking
- Problem solving
- Time management
- Team collaboration

Certificate & Workshops

- Microsoft 101 Certificate – Nemisa
- Digital Literacy Certificate – Nemisa
- Digital Literacy Certificate – C-Delta
- Introduction to Coding – SheCodes
- Web Development Certificate – SheCodes
- Certificate of Attendance – Geekulcha Annual Hackathon
- Certificate of Attendance – GirlCode Hackathon
- Certificate of Attendance –Telkom Hackathon
- Certificate of Attendance – GitHub Constellation
- Workshop (Motse Innovation Centre)
